## EDUCATION

---

### Ontario Tech University

Candidate for Bachelor of Science in Computer Science

Oshawa, Ontario

Sept 2019 – Present

Clubs & Activities: Computer Science Club, Tamil Student Association

## EXPERIENCE

---

### Web Developer

Social Planning Council of Peel

May 2023 – June 2023

Mississauga, Ontario

- Collaborated to construct a web application with a custom search engine to search through Excel data
- Lead the project with another team member while facilitating research, learning, and project management
- Constructed the web application with a front-end UI and custom back-end server
- Tested the web application rigorously with error handling so that it was ready for deployment

### Coding/Robotics Instructor

Code Ninjas

June 2023 – Aug 2023

Markham, Ontario

- Instructed students from ages 10 - 14 about LEGO Robotics with content ranging from sensors and motors
- Taught students how to incorporate Python programming into their robotic creations
- Maintained the organization and cleanliness of the facility before and after each usage and session
- Prepared lesson plans and activities that would combine LEGO hardware and Python programming in robotics

## PROJECTS

---

### SPCP Database Web Application | *React.js, Node.js, Express.js, Chart.js*

May 2023 – June 2023

- Constructed the basic layout of the front-end UI using React.js
- Built the back-end functionality and the search engine functionality with Express.js and Node.js
- Implemented tables and graphs with Chart.js to add interactivity for the user(s)
- Enhanced UI with components from React.js to display a polished and refined aesthetic

### Dog Walking App | *Flutter, Dart, Firestore*

Sept 2022 – Dec 2022

- Coded multiple UIs and pages for application using Flutter widgets
- Implemented and used new widgets to produce sleek and modern UI design for the application
- Programmed the back end and connected it to a cloud database using Dart and Firestore

### SimpleHR | *Express.js, Firebase, Node.js, Twilio, Vue.js*

Feb 2022 – Mar 2022

- Integrated and tested Twilio API and connected the API to the back-end of the project
- Developed routes for REST API using Node.js and express.js
- Used Postman to test REST API with requests for functionality
- Implemented a database and tested the project with sample data using Firebase

## TECHNICAL SKILLS

---

**Languages:** Python, Java, C++, HTML, CSS, JavaScript, SQL, Flutter, Dart, R, Kotlin, C, Clojure, Assembly, XML, JSON

**Frameworks:** React.js, Node.js, Express.js, Chart.js, Vue.js, Flask, JUCE, Socket.io, Qiskit, JavaFX

**Libraries:** NumPy, SciPy, Matplotlib, Pandas, Selenium

**Databases:** pgAdmin, Toad Data Modeller, Firebase, MongoDB, SQLite, PostgreSQL

**Software & Tools:** GitHub, Jupyter Notebook/Google Colaboratory, Postman, VS Code, Git Bash, Ubuntu, Android Studio
